Explain two ways the problem of evil challenges belief in God.

	Firstly, the problem of evil makes people question if God exists. As if God loves everyone, is omnibenevolent, some people wonder why He allows so much suffering in the world. For example, when natural disasters happen and hurt innocent people, it can make people think that God doesn't care or isn't loving and so therefore doesn't actually exist.
	Secondly, the problem of evil makes people question if God is all-powerful. If God is omnipotent enough to stop evil and suffering, then why doesn't He? Some people think that if God can't stop bad things from happening, such as people stealing other people's belongings maybe He isn't as powerful as believers say He is.

Definition in your own words

Theists believe in God and say God is omnipotent, omniscient and omnibenevolent. If this is true, God should stop evil, yet it still happens which makes some people question God, it's known as the 'Problem of Evil'.

Use in a sentence

The problem of evil is a question about how evil and suffering can exist if God exists and is all-powerful and good.

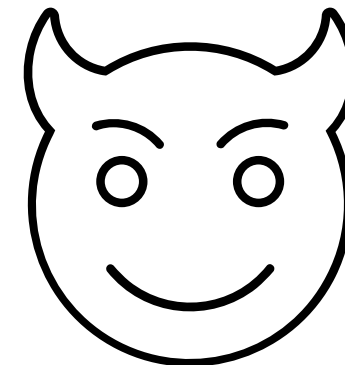

Problem of Evil

Give an example

Moral evil – humans have caused the evil action, it is man-made such as theft

Natural evil – humans have no control over it, it is naturally occurring such as a hurricane.
